THE IOM3 TRAINING ACADEMY AND THE PACKAGING SOCIETY

The IOM3 Training Academy is the training arm of the Institute of Materials, Minerals and Mining and offers a range of courses to meet the training needs of people throughout the packaging industry.

The Packaging Society, formerly the Institute of Packaging (IoP), has been the lead organisation for the British Packaging industry for over sixty five years, with a membership that represents the whole supply chain, including packaging manufacturers, converters, suppliers, packer/fillers and retailers.

Dynamic and innovative, employing thousands of people and making a multi-billion pound contribution to the economy, packaging plays a significant role in protection and promotion of products the world over. As customers and consumers become ever more demanding, and as the market changes, it is more important than ever to ensure that individuals are properly equipped to meet the challenges they face, so they can add value to their businesses and enhance their careers.

The IOM3 Training Academy organises and manages the delivery of training programmes utilising experts, often IOM3 members, who have up to date and relevant industry knowledge.

 **The Packaging Society**

A Division of the Institute of Materials, Minerals and Mining

Packaging courses are developed in conjunction with and endorsed by the Packaging Society, a division of the Institute of Materials, Minerals & Mining.

- Continuous Professional Development – keep abreast of changes within the industry

PACKAGING COURSES CURRENTLY ON OFFER FROM IOM3 TRAINING ACADEMY

IOM3 Training Academy offers a range of industry-recognised packaging courses and qualifications. These include PIABC accredited qualifications as well as training for specific sectors of the packaging industry.

Packaging courses and qualifications offered by the IOM3 Training Academy are developed in conjunction with and endorsed by The Packaging Society.

Diploma in Packaging Technology

The Diploma is a 48 credit Level 5 QCF qualification (foundation degree-level) that equips packaging specialists to run packaging operations at any point in the supply chain. The Diploma can be studied intensively either at The Boilerhouse or onsite in regional centres. An online option is also available.

The Certificate in Packaging

The Certificate is a Level 3 QCF qualification designed to meet the training needs of a wide variety of personnel in packaging, from the new entrant looking for a great start, to design, production, management, sales, marketing or purchasing staff looking to deepen their packaging knowledge.

Print for Packaging

Aimed at non-printers, this course provides a grounding in the techniques and terminology of this vital element of the packaging industry.

EQIPT Evaluators' Qualification in Packaging Technology

A course designed to provide auditors the packaging knowledge to audit to the BRC/IOP Global Standard in Packaging and Packaging Materials and other GFSI accredited packaging standards.

Packaging Specifications

The tools to write, support and reinforce the need for packaging specifications.

Pack Testing

What to test and how. Help make sure your pack survives distribution.

Bespoke Courses

Businesses can opt for a tailored training programme that focuses on their specific requirements and provides a bespoke learning experience for a specific group of employees or an entire workforce. Training programmes can be designed to lead into a qualification if required or to provide a set of information specific to a business or market area, such as pharmaceuticals, cosmetics, food and beverage.
