

The Institute of Materials, Minerals and Mining

The Institute of Materials, Minerals and Mining is one of the UK's 35 professional engineering institutions. With around round 16,000 members from students to CEOs, we award professional qualifications on behalf of the Engineering Council, provide services to keep the knowledge and understanding of our members up to date, and support the teaching of materials, minerals and mining in schools for learners aged 5 to 19.

The Institute provides substantive administrative support for the Polymer Study Tours and we facilitate a number of the courses.
